Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 13-28, and 33-38, drawn to fuel level sending unit, classified in class 73, subclass 313.
 - II. Claims 39-62, drawn to a contact button of a potentiometer, classified in class 338, subclass 202.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a potentiometer that does not have to be apart of a fuel level sending unit.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination.
